

Wake up to a great day.

CPAP Accessories

As an addition to the professional and individual service that we provide to our clients, we have developed a line of fashionable products that make life with CPAP easier and also provides the chance to express your own individuality - "Fashions by Rae".

The cozy covers (shown below) goes over the hose to act as an insulator and helps cut down on the amount of condensation that collects in the hose, enforcing a more comfortable, sterile environment.

The stabilizer mat (shown below) can help keep the CPAP machine stable, and prevents the unit from slipping off the bedside table. Other accessories available are "strap wraps" that prevent marks on the side of the face from the mask or full strap covers for headgear for people who have reactions to the breathoprine (material used in the headgear).

Accessories are available at your local Sleep Therapeutics or [Atlantic Sleep Apnea](#) offices, or arrange for shipping via one of our professional staff members.
